Mohamed Ben Khedher

Full-Stack Developer

PROFILE

Experienced Senior Full-Stack Developer, specialized in crafting captivating mobile and web applications. Passionate about optimizing user experiences through advanced expertise in development, UI/UX design, and API integration.

EXPERIENCES

07/2020 - Present

Leni Tunis / Tunisia

Full-Stack Developer

- Participate in the development of Web, iOS and Android mobile applications (React Native/Cordova) and Web Sites(React).
- Improve and automate processes (builds, Bitbucket Pipeline, Bitrise CI, CD, tests(Detox/Cypress), scripts).
- Lead technical and product decisions.
- Ensure exemplarity in code quality through thorough technical reviews.
- Collaborate on work organisation with the rest of the Product and Engineering teams (tasks management, priority reviews, experimental features, choosing new tools).
- Write technical documentation (design documents and technical proposals, change logs).
- Help grow the team by participating in and improving the hiring process and conducting interviews.
- Have a direct impact on the product and for users.

10/2017 - 06/2020

Incol / Tunisia

Full-Stack Developer

Development of the prototype, then of the MVP of Welcol, a platform for networking and remote consultation via video call in the field of well-being

- Led the development of crucial application components (Php / React / React native / Redux).
- Managed the complete application development lifecycle and contributed to Agile practices.
- Enforced coding standards and participated in code reviews.
- Contributed to designing clean and maintainable architecture.
- Tests and Deployment on stores (App Store, Play Store)
